Meeting Highlights:

We are thrilled about our meeting in Peoria and look forward to seeing many new faces and old friends from this region!

We are very excited to have our Annual IUS Banquet at Two25 located at 225 NE Adams Street in downtown Peoria, IL. Two25 has been deemed a “polished casual” restaurant that serves delicious fine foods only using high quality ingredients paired with an unforgettable dining experience.

Visiting Professor:

Dr. Stuart Wolf is The David A. Bloom Professor of Urology, Associate Department Chair for Clinical Operations and Director of the Division of Endourology and Stone Disease at University of Michigan. His scholarly work has been recognized by awards and/or research grants from the American Foundation for Urologic Disease, the Department of Veterans Affairs, the Endourological Society, the American Society of Transplant Surgeons, the American Urological Association and two sections of the American Urological Association.
Please join us in Peoria for the Illinois Urological Society 2014 Annual Meeting in October. I encourage all our members to attend this meeting designed to benefit each of your practices and provide opportunity to socialize with your professional colleagues. This meeting promises to be one of our best ever.

Mike Koetting, PhD from the Illinois Department of Healthcare and Family Services kicks off the meeting with the legislative update—ACA, Implementation in Illinois. We will continue our tradition of presenting the resident research competition to highlight the excellent academic work being done at the academic programs in our state.

Our NCS/AUA Visiting Professor, Dr. Stuart Wolf from the University of Michigan will update us on AUA Practice Guidelines and the management of UPJ obstruction.

Welcome our other guest speaker, Dr. Aseem Shukla from the University of Minnesota to speak on pediatric robotic surgery and stone disease.

We welcome spouses and guests to the Friday evening functions, which will commence with a cocktail hour followed by the awards banquet – always a great time for all. Also take the opportunity to visit our industry representatives who will be available in the exhibit hall throughout the afternoon and morning session.

The Board of Directors and I look forward to seeing you at this year’s meeting. Encourage a urological colleague to join us too.

M. Melanie Waller, MD
President, Illinois Urological Society

EDUCATIONAL NEEDS & OBJECTIVES

Educational Needs
Urologists and residents in training attending this meeting need to supplement their knowledge base regarding the advancements and controversies in robotic pediatric surgery. They must be able to incorporate the best evidence-based practices into recommending this technology to their patients.

For children diagnosed with nephrolithiasis, the methods of treatment are getting better all the time, and a number of effective treatment techniques are available. Current treatment options will be explored. It is critical that urologists come together to map out a treatment solution that works well for a child’s overall health.

The American Urologic Association guidelines are a valuable practice resource for urologists, in particular community urologists. Attendees will learn about updated guidelines, and how the application of these guidelines reduces treatment variability and improves healthcare outcomes.

The clinical management of ureteropelvic junction obstruction (UPJO) is a rapidly developing area, and minimally invasive surgery is gaining ground in treating this urologic problem. Attendees need to be aware of the latest updates and controversies related to the various treatment options for UPJO.

Educational Objectives
By the conclusion of the IUS 2014 Annual Meeting, attendees should be able to:
1. Explain the rationale for robotic surgical management of pediatric urologic problems.
2. Describe how, and if, robotic pediatric surgery can improve outcomes.
3. Identify methods for treating pediatric stone disease, including minimally invasive surgery.
4. List the advantages and disadvantages of various methods of treating pediatric nephrolithiasis.
5. Identify the importance of the American Urologic Association (AUA) guidelines for the practice of the modern day urologist.
6. Describe the process of developing the AUA guidelines.
7. Interpret the latest updates of the AUA guidelines.
8. Explain different procedures used in the treatment of ureteropelvic junction obstruction (UPJO).
9. Identify the changes in the management of UPJO with the introduction of minimally invasive urology.
10. Integrate updated methods of diagnosing UPJO into office practice, which enhances the quality of treating UPJO in urologists’ offices in Illinois.

Accreditation Statement
Registration Fees are subject to change. To lock in these rates, register now.

Please select the category that best describes your status:

- Industry Employee
- Fellow
- Full Time Administrator
- Non Physician Provider
- Other
- Other Medical Professional
